Experience

Recurse Center, Spring 1 Alumnus Manhattan, New York --- *(February 2015 - May 2015)*

The Recurse Center is a self directed educational retreat for software developers. While there I built ComicGator; an app for reading and discovering webcomics.

- cdb -- postgreSQL comic database. Version controlled and organized with Sqitch.
- lurker -- Custom Scala scraper for webcomic sites.
- maestro -- Spray/Scala RESTful api wrapping cdb.

Yahoo, IC 2 Software Engineer Sunnyvale, California --- *(August 2013 - November 2014)*

Yahoo acquired Lexity in August of 2013 and became Yahoo Commerce Central. While there I ...

- Helped grow the user base 10x.
- Moved from AWS to Yahoo infrastructure and deployed across 2 co-locations.
- Scaled Channelmanager from 3 to 24 machines.
- Clustered the Merchant Database using Percona.

Lexity, Channel Commando Mountain View, California --- *(January 2013 - August 2013)*

Lexity was a startup that built applications for small and medium sized ecommerce merchants. Our key products included: algorithmic bidding for comparison shopping advertising, retargeting, and a sophisticated roi tracking system. I was the...

- Largest contributer and maintainer of the Channelmanager component.
- Channelmanager extracted product and order information from platforms on the behalf of merchants and normalized that data for use by the apps and roi tracker.
- Integrated with 12 ecommerce platforms; including Shopify, Bigcommerce, Magento, Volusion, Ebay and Etsy.

Skills

- Real stuff with Python, Scala, Java.
- Commandlinefu with Python, *nix and vagrant.
- Creation and consumption of api's; RESTful and otherwise.
- Designed and scaled RDBMS (mySQL and postgreSQL).

Education

Bachelor of Science in Applied Physics *(incomplete)* - University of California, Santa Cruz
